Fast Progress Tuition's

Functional Skills English, Maths, Life Skills and Resilience Programme.

Fast Progress Tuition specialise in working with children who have SEN needs and suffer from anxiety and EBSA.

Our purpose built venue is well equipped to ensure students receive professional guidance and support in a safe, nurturing environment.

We don't believe in just offering qualifications, we believe in the FPT education family: we nurture our students and help them progress to their next steps- be that college, apprenticeships or employment pathways.

Our Functional Skills programme is delivered in a way that allows a student centred approach to learning that is accessible to all.

By focusing on each individual young person's needs and ensuring that all aspects of their learning including personal, health and social educational development is catered for.

Our students develop their resilience to change and challenges during the course. They gain self confidence and life skills to aid their transition onto their next steps and pathways, which then becomes a smooth, natural progression.

Online learning isn't suitable for everyone, so we offer a mixed course consisting of face-to-face lessons at our centre on Canvey Island, and home-learning via an online portal where students will have full access to a Tutor.

This ensures personalised support and targeted feedback to aid progression even when studying independently at home.

The Course outline

To achieve a Functional Skills certificate in English, all three components must be completed (writing, comprehension and speaking and listening).

A Maths Functional Skills certificate will be awarded after passing the exam component of the course.

FPT Functional Skills Course:

English, Maths and Speaking and Listening

Lesson breakdown
